

20 High Growth Stocks To Own in 2022!

Looking for Growth in your investment portfolio?

We've found it in these 20 high growth stocks!

20 High Growth Stocks to Buy Today

Here at Investing News Today, we LOVE high growth stocks.

In fact we know growth stocks can deliver investors outsized returns over a short period of time.

Just take a look at Tesla for example...

Since late 2019, TSLA stock has exploded to unprecedented highs delivering returns of roughly 2,500%!

There are few stocks ever to deliver such returns over such short a period of time.

This is why we love growth stocks.

While Tesla is at the top of the food chain when it comes to growth stocks, there are others!

Just consider another amazing example of real growth...NVDA

If you bought NVIDIA stock back in late 2019 and held it till the end of 2021, you'd see a gain of 911% in just 2 years!

Yep, 9x returns!

Where else in the world can you find returns like that... other than growth stocks?

We believe growth stocks are unequalled in their potential for serious gains!

Better still, there's plenty more examples of great returns in growth stocks.

Take for example Netflix...

If you were smart enough to have picked up shares of NFLX back in late 2019, you'd have seen a gain of over 169% by late 2021.

That may sound meager in comparison to the extremely rare gains from the likes of TSLA.

However, compared to the Russell 3000 index, you'd find a 169% gain in NFLX is pretty impressive.

Remember, the Russell 3000 index is a hand selected list of 3,000 of the top small cap growth stocks. It's had an impressive run too!

Take a look for yourself below...

The IWW is the tracking index for the Russell 3000. As you see, you'd need to hold this ETF from 2011 to 2021 to see the big gains of 310% in that 10 year period.

Now, 310% over 10 years is incredible, and again goes to show how powerful growth stocks have been over the past decade!

Below, you'll find our list of 20 High Growth Stocks to Buy Now.

And these aren't some random penny stocks that are thinly traded and can put you at risk of imminent loss.

No, our list has been researched and screened by our staff as candidates for amazing returns while still being high revenue growth companies with solid trading volume... yet still offering investors unmet growth potential!

Before you jump in and get started, let me share just a few of the key metrics we used to develop this list.

We examined things like:

- Market Cap Under \$10 Billion so we can still see good growth
- Positive EPS growth projected for the next 5 years

- 20% or higher Quarter over Quarter Sales Growth so we know it's growing well in a strong economy
- Strong institutional ownership
- Trades over 100,000 shares average daily, so we know liquidity isn't an issue

Without any further ado and in no particular order...

20 High Growth Stocks to Buy Now

1. PAM - Pampa Energia S.A.
2. COWN - Cowen

Don't forget this...

If I can share one secret with you about investing in growth stocks... It's critical you stay informed and get your information from reliable resources.

Top of the list - read every article we publish at InvestmentNewsToday.com. That alone could give you investing ideas worth thousands!

Remember, always do your own research!

I remember a crusty old guy telling me once... *It's your money, and nobody will care for it more than you!*

So, research these ideas. Read the company websites and disclosures. Follow the stocks for a while. Information is your friend. And for goodness sakes, don't put every last penny you have into a single stock - spread it around for diversification!

Keep yourself informed and before long you'll be your own investing expert!

Our next newsletter will be out shortly - so keep an eye on your email inbox... and if you have any questions, just reply back to any email I send - I'll try to get you an answer.
